ORGANISERS

BAKU ENERGY WEEK

Taking in count current trends in the energy sector, **Baku Energy Week** in Azerbaijan has combined 3 major events under its brand - the 27th International Caspian Oil & Gas Exhibition, the 10th Anniversary Caspian International Energy and Renewable Energy Exhibition and the Baku Energy Forum.

Caspian Oil&Gas - a meeting place for leading professionals in oil, gas and energy segments, where memorandums, agreements and contracts on further cooperation are signed. The list of participants of the exhibition and conference includes the leading companies in the oil and energy sector of the world.

Caspian Power - a unique meeting place for power producers, government agencies and foreign investors, where unlimited opportunities for cooperation and long-term partnership open up.

OFFICIAL OPENING CEREMONY OF THE BAKU ENERGY WEEK

On June 1st, 2022, the official opening of the Baku Energy Week took place at Baku Expo Center. President of the Republic of Azerbaijan Ilham Aliyev participated in this event. Once again it confirms the importance and status of the event.

“Dear ladies and gentlemen.

First of all, I would like to express gratitude to the organizers for the restart of the Caspian Oil and Gas Show after two years break due to a pandemic. I am glad that today we have guests from all over the world. I hope discussions during the Oil and Gas Show and the Baku Energy week will strengthen dialogue on such important issues as energy security and diversification of energy resources. Azerbaijan invested in its energy security during the years of independence and provided total demands for the domestic market and also is playing a more and more important role in the energy security of a growing number of countries. This was not the case in the early years of our independence. I would also like to mention that Caspian Oil and Gas Exhibition and Conference, which is already taking place for the 27th time, played a very important role in attracting the attention of global energy players to Azerbaijan, the country at that time newly independent with a lot of difficulties with a big part of its territory under occupation and facing a lot of challenges.”

OFFICIAL GUESTS OF BAKU ENERGY WEEK

Parviz Shahbazov
Minister of Energy of
the Republic of Azerbaijan

Mikayil Jabbarov
Minister of Economy of
the Republic of Azerbaijan

Mukhtar Babayev
Minister of Ecology and
Natural Resources of
the Republic of Azerbaijan

Shahmar Movsumov
Assistant to the President
of the Republic of Azerbaijan

Rovshan Najaf
First Vice-President of
the State Oil Company of
the Republic of Azerbaijan,
Acting President of SOCAR

Zorana Mihajlovic
Deputy Prime Minister,
Minister of Mining Industry
and Energy
(Republic of Serbia)

Andrei Spinu
Deputy Prime Minister,
Minister of Infrastructure and
Regional Development
(Moldova)

Peter Szijártó
Minister of
Foreign Affairs and Trade
(Hungary)

Laura Lochman
Deputy Assistant Secretary
for Energy Diplomacy in
the Bureau of Energy Resources.
(USA)

Cristina Lobillo Borrero
Director General for Energy
(European Commission)

Virgil-Daniel Popescu
Minister of Energy
(Romania)

Alexander Nikolov
Minister of Energy
(Bulgaria)

Javad Owji
Minister of Petroleum
(Islamic Republic of Iran)

Bulat Agchulagov
Minister of Energy
(Kazakhstan)

Joseph McMonigle
Secretary General,
International Energy Forum

Mohamed Hamel
Secretary General of the
Gas Exporting Countries Forum

Vannia Gava
Deputy Minister of
Ecological Transition
(Italy)

Tutuka Ariadji
Director General of Oil and Gas,
Ministry of Energy and
Mineral Resources,
(Indonesia)

Lyudmil Yotsov
Member of the
Management Board and
Executive Director,
Bulgargaz EAD

Saltuk Duzyol
CEO of TANAP Consortium

Francesco La Camera
Director-General of
the International Renewable
Energy Agency
(IRENA)

Gordon Birrell
Executive Vice President -
Production & Operations at bp

Gary Jones
regional president of BP for
Azerbaijan, Georgia and Turkey

Council, international expert and
former US Ambassador
to Azerbaijan

Stig Åtland
Vice President for
Exploration & Production,
manager for Azerbaijan
(Equinor)

OFFICIAL GREETING LETTER FROM THE PRESIDENT OF THE REPUBLIC OF AZERBAIJAN, ILHAM ALIYEV TO THE PARTICIPANTS OF THE "BAKU ENERGY WEEK"

Dear Exhibition and Forum participants,
Dear Ladies and Gentlemen,

I welcome you on the occasion of the opening of the Baku Energy Week, which unites several energy events, and wish you all good health and success in your future endeavours on behalf of your countries. As the most prestigious event in the oil and gas industry and energy sector of the Caspian region, the Baku Energy Week brings together the 27th International Caspian Oil & Gas Exhibition, the 10th Anniversary Caspian International Power and Renewable Energy Exhibition, as well as the Baku Energy Forum, which is the successor to the Caspian Oil and Gas Conference.

The Baku Energy Week is being reorganised after a two-year break caused by the Covid pandemic, which the Azerbaijani Government has been successfully fighting. Both live meetings and face-to-face communication with industry leaders of the region add to the importance of this year's Exhibition and Forum. This year's Baku Energy Week brings together key players of the global energy market and international companies for new cooperation in creating more sustainable and secure energy centres of gravity.

It is very significant that issues such as decarbonisation, increasing green energy forms, as well as affordable and safe energy supplies, which have become a global challenge, are at the top of the agenda of this year's Energy Week dialogue. At the same time, the Baku Energy Forum has continued the tradition of the Caspian Oil and Gas Conference, which has gained the status of a major event in the energy sector and expanded its agenda with new energy segments.

The challenges facing the world and the expected structural changes in the global energy balance have brought up the duties such as increasing sustainable and clean energy capacity for the region and identifying new energy routes. Taking this into account, Azerbaijan, one of the important players in ensuring global and regional energy security, implements sustainable projects, especially for the development of renewable energy, supports close integration with neighbouring countries' energy systems, maintaining peace, stability, and security in the region.

Given the growing importance of natural gas in the energy transformation, the significance of the Southern Gas Corridor project is growing even further. This project, which is of strategic importance for Azerbaijan, plays a major role in ensuring Europe's energy security, and there are great opportunities for further expansion of this energy corridor.

Azerbaijan has set long-term goals with respect to energy security, especially green energy policy. In the field of energy, open, transparent, business-focused, and results-oriented cooperation and mutual support are our permanent principles. By 2030, we have identified becoming a "green growth" country and achieving a clean environment as one of our national priorities for socio-economic development. Such a policy will provide a perfect foundation for a successful energy transformation in the region. The existing stability, economic development, modern infrastructure, favourable business environment, and the great energy potential in our country have created broad prospects for the production and export of renewable energy.

Azerbaijan, together with companies with extensive experience in the energy sector, has launched large-scale projects aimed at creating new renewable energy forces. Significant progress has already been made in creating a new generation power of 855 megawatts. This further improves and strengthens the position of Azerbaijan as a reliable supplier of new energy resources in international markets.

In this process, the diversification of energy resources, decarbonisation, as well as increasing the use of natural gas as a source of low-carbon energy carry particular importance. The great energy potential of our liberated historical territories promises broad prospects for the implementation of successful "green energy" projects and energy security in the region. According to the reports, the production of solar and wind energy in Karabakh and East Zangazur can reach about 9-10 thousand megawatts. For these purposes, together with leading international companies, conceptual projects have already been prepared for the "green energy" zone in Karabakh and East Zangazur; the creation of a unique "green energy zone" concept consisting of modern renewable energy sources continues. Along with vast natural gas reserves, our renewable energy potential paves the way for important opportunities to become a "green growth" country.

Distinguished by its special position in the development of the world oil and energy industry, Azerbaijan has also been implementing large-scale investment projects in various countries. Today, the position of our country, which is recognised as a reliable partner in the international arena, is becoming even stronger. We are fulfilling our obligations and creating favourable conditions for foreign investors.

We should further expand our cooperation to ensure energy security, diversification, and the transition to green energy in the region. In order to successfully meet the challenges of energy security in the future, the application of new technologies and digital solutions in this area should prevail.

Dear Exhibition and Forum participants, Azerbaijan has long hosted this event of global importance. I believe that thanks to its many years of experience, your exhibition and forum will open new horizons for our broad economic relations and contribute to fruitful cooperation in an atmosphere of mutual understanding with comprehensive reports, discussions and exchange of views on current issues.

I once again wish you success in your activities at the Baku Energy Week!

Ilham Aliyev
The President of the Republic of Azerbaijan

WELCOME LETTER

A welcome letter addressed to the participants and visitors of the Baku Energy Week from US President Joseph Biden was read by Laura Logman, Deputy Assistant Secretary of State for US Energy Diplomacy

«Dear Mr. President,

During the 30 years of diplomatic relations, we have enjoyed between the United States and the Republic of Azerbaijan, we have become strong partners in combatting transnational threats, advancing energy security, and encouraging bilateral trade and investment. As you host the International Caspian Oil & Gas Exhibition in Baku, I want to assure you that Azerbaijan continues to have a committed partner in the United States.

Around the world, we find ourselves at an important juncture in ensuring our energy security, while making the necessary investments and changes to meet our longer-term commitments to the clean energy transition. Diversification is more important than ever in addressing our energy security goals, and Azerbaijan has played a central role in region efforts toward this goal. Azerbaijan is also critical to realizing the immense potential of trans-Caspian cooperation to help stabilize markets in the region and globally. And Azerbaijan is playing a crucial role in helping stabilize European energy security, including through the Southern Gas Corridor and by providing crucial fuel supplies to Ukraine.

I welcome you continued steps to help achieve Azerbaijan's full potential, including by promoting a diversified economy, contributing to global goals to fight climate change through investments in renewables, strengthening the rule of law and accountability and boosting the standard of living of the Azerbaijani people. The United States is committed to our continued partnership and cooperation. »

WELCOME LETTER

Ambassador of Turkiye to Azerbaijan Cahit Bagchi delivered a letter of welcome from President of Turkiye Recep Tayyip Erdogan

«Distinguished participants,

Dear Representatives of the Public Sector and Business World,
Distinguished Guests,

I welcome you with my most heartfelt feelings and respect.

I wish that all events organised on the occasion of Baku Energy Week, including the Special Session in Shusha, will be fruitful. As in every sector, our excellent level of cooperation with Dear Azerbaijan in the energy sector is of strategic nature for our countries and our region.

By realising mega infrastructure investments such as Baku-Tbilisi-Ceyhan, Baku-Tbilisi-Erzurum pipelines and Trans-Anatolian Natural Gas Pipeline TANAP, we have made vital contributions to regional and global energy supply security.

In the critical period we are in, the Southern Gas Corridor, which is the backbone of TANAP, is the fourth natural gas artery of Europe.

To date, 15 billion cubic meters of natural gas has been shipped to Turkey and 10 billion cubic meters of natural gas to other European countries through the Southern Gas Corridor.

As we emphasised in the Shusha Declaration, in which we raised our relations to the level of Allies, together with my brother Ilham, we attach importance to increasing the capacity of the Southern Gas Corridor.

Current developments in the international plan show the accuracy of these steps we have taken.

The vital importance of Turkey-Azerbaijan cooperation for the energy security of Europe is now better understood.

Under the leadership of my brother Ilham Aliyev, Azerbaijan's vision in the renewable energy sector has become a guidance in terms of regional stability and prosperity.

In this context, declaring Karabakh and East Zangezur as "Green Energy Zone" is a very accurate step.

I wish the continuation of the success of Baku Energy Week, which is organised at a time when the importance of energy and energy security is increasing, and I welcome all participants with my most heartfelt feelings. »

WELCOME LETTER

A special video message from the British Secretary of State for Business, Energy and Clean Growth, Greg Hands, was presented to the participants of the opening ceremony of the Baku Energy Week.

«President Aliyev. Your Excellences. Thank you for the chance to address the Baku Energy Week. I also want to congratulate both nations on the 30 years of anniversary of diplomatic relations between the UK and Azerbaijan.

This event comes at an important time for European Energy Security and for our climate. We recognize the extraordinary circumstances we find ourselves in due to a war in Ukraine. This new reality underscores the critical choices facing us on energy. Now more than ever, we must urgently work together to accelerate the shift to clean power generation and zero carbon economies.

Today Azerbaijan is a reliable and stable supplier of natural gas to Georgia, Turkey and partners across Europe. The Southern Gas Corridor that starts from Azerbaijan represents a significant achievement. The expansion of the Southern Gas Corridor will support the diversification of gas supply to Europe. Natural gas will continue to play a crucial role while we are phasing out coal and transitioning to clean energy.

Last year at COP26 under the UK Presidency we saw impressive commitments. We welcome the commitments that our partners, including the Government of Azerbaijan made at COP26 and look for further ambition in current targets. The UK also welcomes Azerbaijan's commitment to clean energy transition.

One advantage of net zero is that represents total energy security. Net zero also means prosperity. Increasing price of oil and gas makes the case for investing in clean energy even stronger.

UK companies, such as BP who have been a close partner of Azerbaijan for the past three decades, adopted ambitious plans to reach net zero by 2050. Countries like Azerbaijan have a high potential to become the net zero champions. The window of time we have left to keep 1.5 in reach is closing fast. It is essential that we act now to deliver the Glasgow Climate Pact signed last year. Every country must respond to the call to revisit and strengthen their emission reduction target.

We must continue to work together on how the commitments will be achieved, to make good on our promises and ensure our commitments turn into reality.

President Aliyev. Your excellences. The UK is ready to work with all partners to accelerate global clean energy transition that will ensure energy security and help to tackle climate change.

Thank you.»

REVIEWS OF OFFICIAL GUESTS

This exhibition, initiated by the oil strategy of National Leader Heydar Aliyev as one of the most important international events has been playing an important role in attracting global interest in the development of Azerbaijan and promoting its achievements around the world for many years.

Parviz Shahbazov,
Minister of Energy of
the Republic of Azerbaijan

The events organized within the framework of the Baku Energy Week create an atmosphere of genuine mutual understanding between all participants and open new horizons for broad economic ties. The number of participants in this year's events is a clear indication of the growing interest in the event. I am confident that the Baku Energy Week will contribute to effective cooperation in the context of the energy processes taking place in the world and once again prove that it is an important platform for the formation of new partnerships.

Rovshan Najaf,
First Vice President,
and Acting President, SOCAR

Azerbaijan has achieved great success in the development of the energy sector, and it continues developing rapidly. It is now the largest such exhibition in the entire region, where many projects are discussed. Look, the exhibitions opened just a couple of hours ago, and already a success! It is fantastic, it is really impressive.

Matthew Bryza,
Board Member of the Jamestown Foundation,
Senior Fellow at the Atlantic Council,
international expert and former US Ambassador
to Azerbaijan

PRESS CONFERENCE

A PRESS CONFERENCE DEDICATED TO THE OPENING OF THE BAKU ENERGY WEEK WAS HELD ON MAY 24 AT THE HILTON BAKU HOTEL.

THE PRESS CONFERENCE WAS ATTENDED BY

Farid Mammadov,
director general of
Itca Caspian

VISITOR REVIEWS

I believe that holding such interesting exhibitions is essential, especially after the pandemic. During pandemic almost all of us were forced to switch to online mode. However, nothing can replace traditional exhibitions, live negotiations and acquaintances. An exhibition is always a place for contacts, bringing together interested specialists, and is an unconditional factor in the development of market.

Javier Entrena,
Export Sales Manager at Grupo PV

The exhibition is very hospitable, the organisation is perfect. All stands are intelligently divided into sectors and directions. It is very convenient. One immediately feels the style of an important event, where suppliers and buyers directly discuss joint business. This saves time and finances. Here we have the opportunity to go through our tasks in many directions.

Abdulaziz Khamraliev,
Sales Manager from Diz Energo, Uzbekistan

The world of technologies does not stand still and is constantly improving, therefore, I came to "Caspian Oil and Gas" exhibition with desire to get acquainted with the international innovative products, latest in the industry. Domestic and foreign participants offer many new ideas that may be of interest in our daily work.

Rizvan Sadygov,
chief engineer of the Experimental Production Enterprise for the repair and rental of submersible facilities, Azneft Production Association

It is praiseworthy that at each stand you can meet the general director and technical staff. This is important for negotiating and obtaining accurate information about the companies and their products. Impressions are amazing, there are numerous professional visitors!

Dmitry Velmov,
Project Manager, Civil Aviation Department, CJSC "Rosma"

I liked the exhibition very much, it was organised at a good level. I would even say that one day will not be enough for me. Practically at every stand I find useful information for our company. I have noted for myself 2-3 local companies, which I am going to get acquainted with tomorrow and hold negotiations.

Yulia Zgonnikova,
Regional Export Manager, "Systema"

PARTICIPANTS` REVIEWS

Exhibitions always help to make new acquaintances, to define new directions of activity. The exhibition is interesting, professionally organized. All companies involved in the industry are present. We already had many meetings and made contacts over the past two days. I hope that on this basis we will continue to develop our business here.

Vasily Signeev,
Head of Transcaucasia Energocontract

For many years, the German pavilion has been participating in the Caspian Oil and Gas exhibition. Based on the results of the first day of work, I can say that my fellow participants are satisfied with the way the exhibition is going. I believe that such events bring good results, advantages to all participating companies that visit Azerbaijan every year, which indicates their continued interest.

Robin Witte,
Director, IEC Germany Pavilion

For the first time we participate in the exhibition "Power and Renewable Energy". For us, this event is a good marketing opportunity to demonstrate our capabilities and company products. The exhibition was immediately remembered for the speech of the President of Azerbaijan Ilham Aliyev at the opening ceremony. I would like to note the good organisation of the exhibition. The exhibition is the place where participants and visitors feel joy, confidence and professional pride.

Clive Turton, ACWA Power

The exhibition has become an important platform for the development of the industry and business. I believe that the exhibition today is of a presentation nature, where you can see the product, compare it, and learn about its technical capabilities.

Yuriy Moiseenko,
"ISB Industries"-in Şərqi Avropa və
Mərkəzi Asiya üzrə meneceri

The pandemic has cut off people from each other. And the exhibition is a place where we can meet again, share information with each other, learn a lot of new things. The exhibition turned out to be serious, large-scale and is organized at a high level.

Slavica Mijajlovic-Bogojevic,
PLAMEN Export Manager

EXHIBITION BUSINESS PROGRAM

AS PART OF THE BUSINESS PROGRAM, SESSIONS WERE HELD ON TOPICAL TOPICS:

- "Advanced solutions for automation in the oil and gas industry"
- «HSE-management in the oil industry»
- "Large diameter pipes for special purposes"
- Clients vs Vendors "How to become a sought-after supplier in the oil and gas market"
- Technology – Drones, crawlers/robots
- AGT Low Carbon
- Renewable energy sources
- "Women in Energy"
- Agility
- "Journey to the energy sector of Azerbaijan and a look into the future"
- Bilateral business meetings were held.

EVENING RECEPTION

The evening reception dedicated to the opening of the Baku Energy Week was held on June 2 at the JW Marriott Hotel

OFFSITE SESSION IN SHUSHA

ON JULY 4TH, SUPPORTED BY STATE OIL COMPANY OF AZERBAIJAN SOCAR SHUSHA CITY HOSTED A MOBILE SESSION "THE PATH TO ZERO EMISSIONS: Developing the Green Energy Potential of the Liberated Territories" as a continuation of the Baku Energy Week.

Within the framework of the session, cooperation agreements were signed between the Ministry of Energy of the Republic of Azerbaijan, The State Oil Company Of Azerbaijan SOCAR and foreign companies Masdar and bp. The goals of signing the documents are to ensure the decarbonization of oil and gas operations, the use of advanced technologies in the field of energy efficiency and the joint development of renewable energy sources
